They don't usually arrive until the second half of April ... I saw and heard (when I went up close) a hummingbird hawkmoth in my garden gathering pollen from red campion I have growing.

Children love stories. Bring the magic of good storytelling into your classroom with Classic Tales, and they'll love their English lessons too. 'Let's have a race', the hummingbird said to the heron. But who was the winner?

Chief Inspector Domenic Jejeune hopes an overseas birding trip will hold some clues to solving his fugitive brother's manslaughter case. Meanwhile, in Jejeune's absence his long-time nemesis has been drafted in as cover to investigate an accountant's murder. And unfortunately Marvin Laraby proves just a bit too effective in showing how an investigation should be handled. With the manslaughter case poised to claim another victim, Jejeune learns an accident back home in Britain involving his girlfriend, Lindy, is much more than it seems. Lindy is in grave danger, and she needs Jejeune. Soon, he is faced with a further dilemma. He can speak up on a secret he has discovered relating to Laraby's case, knowing it will cost his job on the north Norfolk coast he loves. Or he can stay silent, and let a killer escape justice. Turns out that sometimes the wrong choice is the only one there is.

Lorsque vous achetez ce livre, vous obtenez une version numérique (fichier PDF) du contenu de ce livre. Voulez-vous que vos enfants apprennent et s'amuse en même temps ? Voulez-vous qu'ils s'améliorent en maths et améliorent la motricité fine de façon amusante ? Laissez votre enfant suivre ce livre d'activités facile et amusant rempli d'animaux, explorer chaque puzzle et laissez-le trouver l'animal complet tout en apprenant des choses ! Cet ultime livre d'activités « Relier les points animaux » pour enfants contient 36 animaux incroyables. Dès que vous avez trouvé l'animal, vous pouvez le colorier. Ce livre incroyable est parfait pour les enfants de tous âges qui ont une passion pour les animaux et qui veulent apprendre de façon amusante et facile et souhaitent améliorer leur capacité de résolution de problèmes, renforcer la confiance, améliorer la motricité fine et utiliser le temps libre de façon utile.

Including the red-winged blackbird, painted bunting, wood duck, great blue heron, ruby-throated hummingbird, purple finch, and blue jay, 46 different species of birds from all parts of the United States are included in this book. The pictures have been faithfully redrawn by Paul E. Kennedy from originals by John James Audubon (1785-1851), the most famous American painter-naturalist. For each species, the caption supplies the modern common and scientific names and the current range (by general region). No distinction is made between breeding range and winter range. Only the area of the United States, exclusive of Alaska and Hawaii, is considered. The birds shown are usually adult males when the caption does not give the information on age and sex. Audubon's original plates, numbered to correspond to the pages of the book, have been reproduced in color on the covers. If you follow them, you will not only have a great deal of coloring pleasure, but you will also learn how to identify many important birds.

Nobel Prize winner Yasunari Kawabata felt the essence of his art was to be found not in his longer works but in a series of short-stories which he called Palm-of-the-hand-stories - written over the span of his career. In them we find loneliness, love and the passage of time, demonstrating the range and complexity of a true master.

A birding site to these Caribbean islands, with information on seasonal distribution, complete lists of mammals and amphibians and reptiles, and thorough travel advice.

A natural history of birds provides information on more than nine hundred species of birds, including what they eat, where they build their nests, how many eggs they lay, what habitat they choose, when they migrate, and their current conservation status.

NOW A MAJOR MOTION PICTURE The #1 New York Times bestselling worldwide sensation with more than 12 million copies sold, "a painfully beautiful first novel that is at once a murder mystery, a coming-of-age narrative and a celebration of nature" (The New York Times Book Review). For years, rumors of the "Marsh Girl" have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. *Where the Crawdads Sing* is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Delia Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps.

In early April, as Owen and his sister search the hickories, oaks, and dogwoods for returning birds, a huge group of birds leaves the misty mountain slopes of the Yucatan peninsula for the 600-mile flight across the Gulf of Mexico to their summer nesting grounds. One of them is a Cerulean warbler. He will lose more than half his body weight even if the journey goes well. Aloft over the vast ocean, the birds encourage each other with squeaky chirps that say, "We are still alive. We can do this." Owen's family watches televised reports of a great storm over the Gulf of Mexico, fearing what it may mean for migrating songbirds. In alternating spreads, we wait and hope with Owen, then struggle through the storm with the warbler. This moving story with its hopeful ending appeals to us to preserve the things we love. The backmatter includes a North American bird migration map, birding information for kids, and guidance for how native plantings can transform yards into bird and wildlife habitat.
