""Melanie Karsak's Chasing the star garden, the first novel in a stunning new steampunk series, takes the reader on an exciting adventure from the gritty opium dens of gaslamp London to the gem-colored waters of the ancient world"--P. [4] of cover.

It's no secret that the center of Christianity has shifted from the West to the global South and East. While the truths of the Christian faith are universal, new contexts bring new questions, new understandings,

and new expressions. What does this mean for theology? Is the Christian faith not only culturally translatable, but also theologically translatable? Timothy Tennent answers this question with a resounding yes. Theological reflection is alive and well in the majority world church, and these new perspectives need to be heard, considered, and brought into conversation with Western theologians. Global theology can make us aware of our own blind spots and biases. Because of its largely conservative stance, global theology has much to offer toward the revitalization of Western Christianity. Tennent examines traditional theological categories in conversation with theologians from across the globe, making this volume valuable for students, pastors, missionaries, and theologians alike.

What does it mean to be a disciple of Christ today? And are Christians really prepared for the answers? In *Mere Discipleship*, Lee Camp sets forth his vision of what it means to truly follow Christ, challenging Christians to put obedience to Jesus as Lord ahead of allegiances to all earthly authorities--be they nationalistic, political, economic, or cultural. Camp clearly lays out a sound biblical framework of what disciples believe and therefore what they should do. This substantially revised and expanded second edition updates examples, adds chapter introductions and summaries, and includes new study questions.

This major history of the Christian Church in Africa spans five centuries and the whole compass of different Christian movements from the old Ethiopian Church to Catholic and Protestant missionaries and the independent churches of today.

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.

Object technology pioneer Wirfs-Brock teams with expert McKean to present a thoroughly updated, modern, and proven method for the design of software. The book is packed with practical design techniques that enable the practitioner to get the job done.

Chasing the Green Fairy The Airship Racing Chronicles Book II A sabotaged airship. A recovering opium addict. A messenger with life-shattering news. With the 1824 British airship qualifying race only weeks away, Lily Stargazer is at the top of her game. She's racing like a pro, truly in love, and living clean. But on one ill-omened day, everything changes. Pulled head-long into the ancient secrets of the realm, Lily soon finds herself embroiled in Celtic mysteries and fairy lore. And she's not quite sure how she got there, or even if she wants to be involved. But Lily soon finds herself chasing the spirit of the realm while putting her own ghosts to rest. And only accepting the truth-about her heart and her country-can save her. Begin the adventure with Chasing the Star Garden, The Airship Racing Chronicles I.

Open this book and you will Grasp quantum theory Understand its importance Examine paradoxes Explore the atom

The title is an effective, manualized parent education programme' - Educational Book Review This ground-breaking training programme has been developed in response to a real need for evidence-based early interventions for very young autistic children. Authoritative and extensively tried and tested, it will help both parents and carers to understand the disorder and how it affects child development. Ultimately, the programme is designed to reduce the severity of emotional/behavioural difficulties by managing a child's particular problems and encouraging effective collaboration between professionals and parents. The programme is delivered through two accessible manuals - one for parents and one for clinicians - which provide all the information and materials you need. The Manual for Clinicians explains the purpose and content of each session and includes notes for discussion and teaching, a checklist of 'things to do', and photocopiable task sheets for distribution and discussion. The Manual for Parents features tasks, exercises and discussion points for group sessions, and complements these training materials with engaging personal accounts, an introduction to the history of autism, information about approaches to treatment, and a list of useful websites and further reading. Structured as a series of individual and small group sessions, the programme is designed to run for 20 weeks and covers key areas such as understanding and managing difficult behaviour; changing/encouraging new behaviours; communication problems in verbal and non-verbal children; social problems; and how to work and play together. Together, these manuals will provide you with all the information, support and resources you need to run this programme successfully.

The author presents a working model for the development of a personal biblical ethic and then applies his model to a prominent ethical issue in Cameroon - polygamy.
